

Fats, Oils, & Grease (FOG) can be found in food scraps, meat fats, lard, oil, butter, sauces, salad dressings, marinades, & dairy products.

When you wash dishes, **FOG** can go down the drain and into the sewer, where it builds up in pipes. **FOG** leads to clogs and overflows, which are a health hazard, expensive to fix, and pollute the environment.

Keep FOG out of the drain & out of our pipes

Scrape leftover food into the trash

Wipe greasy pans with a towel first

Save & reuse oil or toss it in the trash
